

LA ZAMBRA
Sustainability Commitment

We care for *the planet*

Reducing Carbon Footprint: We implement energy-efficient technologies and promote the use of renewable energy to minimise our carbon footprint.

Managing Water Footprint: We adopt practices to optimise water use, including the installation of low-consumption devices in our facilities.

Sustainable Waste Management: We promote recycling, waste reduction, and material reuse to manage our waste responsibly and encourage circular economy programmes.

Responsible Purchasing: We ensure that our suppliers share our sustainability values, prioritising local and sustainable products.

We care for *people*

A photograph of three people sitting on a wooden bench outdoors, likely on a golf course. On the left, a woman wears a large white straw hat and sunglasses, laughing. In the center, a woman with long brown hair and sunglasses is also laughing, her hand near her face. On the right, a man with a beard and glasses is laughing, his hand near his mouth. They are all wearing light-colored clothing. The background shows a green golf course with sand traps and trees under a warm, golden light.

Diversity and Equity

We foster an inclusive and diverse environment, offering equal opportunities to all our employees and guests.

Community

We actively participate in community initiatives, contributing to the social and economic well-being of the region.

Preserving Culture and Heritage

We celebrate and preserve Andalusian culture through activities and collaborations with local artists and artisans.

Awareness and Training

We provide continuous training to our employees on sustainable practices and promote awareness among our guests.

Km0 Consumption

We support local producers by purchasing fresh, seasonal products, thereby reducing the transportation footprint.

Regenerative *Purpose*

Community Collaboration Programmes: We collaborate with local organisations on projects that promote sustainability and community development, ensuring that our activities benefit the local population.

Protecting Local Biodiversity: We implement measures to protect and restore the natural environment, working with conservation experts to preserve native flora and fauna.

La Zambra is dedicated to creating a sustainable and regenerative future by integrating these principles into all our daily operations.
